

Objective

To analyze bike station data and understand station availability, bike stands, open/closed stations, bonus stations, and banking stations across different cities.

Key Findings

Total Stations: 3K

Total Bike Stands: 57K

Available Bikes: 20K

Open Stations: 3K

Closed Stations: 206

Bonus Stations: 70

Banking Stations: 336

Insights

Brussels-Capital has the highest number of available bikes.

Lyon and Toulouse also show high bike availability.

Most stations are currently open.

Banking stations are concentrated in a few cities.

Closed stations are comparatively low.

Recommendations

Increase bikes in cities with lower availability.

Reduce station downtime through maintenance.

Expand bike stands in high-demand cities.

Monitor closed stations and reopen them when possible.

Conclusion

The dashboard provides a clear view of bike-sharing operations and helps identify city-wise performance, station availability, and operational improvements.
